

Angela M. Rubalcava

San Jose, California | amrubalcava15@gmail.com

Objective

Full Stack Software Engineer with 3 years of experience building and shipping production systems across frontend, backend, and DevOps in a fast-paced startup environment. Proven track record of reducing bugs, improving developer workflows, and delivering compliance-critical features

Education

University of San Francisco | San Francisco, CA

August 2019 – May 2023

Bachelor of Science in Computer Science

Skills

Programming Languages: Java, Python, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React, Angular, Next.js, React Testing Library

DevOps & Infrastructure: Docker, Bento, Redis, Fluentd, Vercel, Bitbucket Pipelines

Testing & Tools: Cypress, Git

Languages: English (fluent), Spanish (fluent)

Experience

Consilient Labs Inc. | Remote Position

July 2023 - Present

Full Stack Software Engineer

- Built end-to-end Cypress testing infrastructure for an Angular app — including custom commands, Bitbucket CI/CD integration, and developer docs — reducing bug escape rate by 50% and accelerating development velocity
- Led migration from JavaScript to TypeScript, defining team-wide type conventions and tooling configuration that reduced type-related bugs and improved developer confidence across refactoring and feature work
- Integrated legal documentation features into a React web app, delivering compliance-critical functionality required for the product's public launch
- Architected and built a production-grade data service microservice using Bento and Docker, with logging infrastructure (file + Fluentd), automated health checks, a CI/CD pipeline, and full repository documentation
- Implemented Fluentd as a unified logging solution, reducing memory footprint, establishing a structured log format used as an internal data source, and enabling filter plugins for improved log searchability

Projects

USFCA Registration Tool

Summer 2021

Microsoft SF Summer Challenge Project

- Engineered a tree algorithm to generate conflict-free class schedules, simplifying the registration process for USFCA students
- Built responsive timetables in Vanilla JavaScript with Toast UI, supporting filtering, editing, and sorting
- Authored product and technical specifications guiding the project from planning through delivery

Telemetry8

Spring 2023

USFCA Senior Capstone Project - Consilient Labs

- Built a React/Next.js frontend interfacing with a company REST API to deliver real-time telemetry features for their existing platform
- Used Bento to transform and normalize raw logs (Cloud Init, Kern, Sys) into structured JSON for seamless ETL pipeline ingestion
